

SKYLINE TOOLS

No contracts, **No limitations,**
Zero start-up fees, \$150 a month

Our Vision

Skyline.tools was created to give every shop better control, awareness, and the understanding of the materials they purchase to obtain their Material Gross Profit. Skyline Tools is not just “inventory control” — it gives the shop the ability to make money.

We also wanted the shop to have secured purchasing data and history that belongs to them. Skyline Tools Shops OWN their data exclusively.

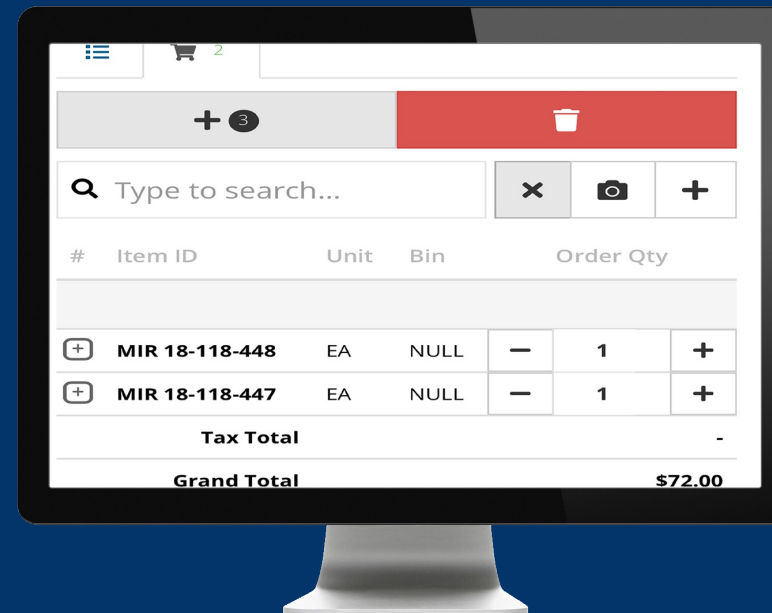

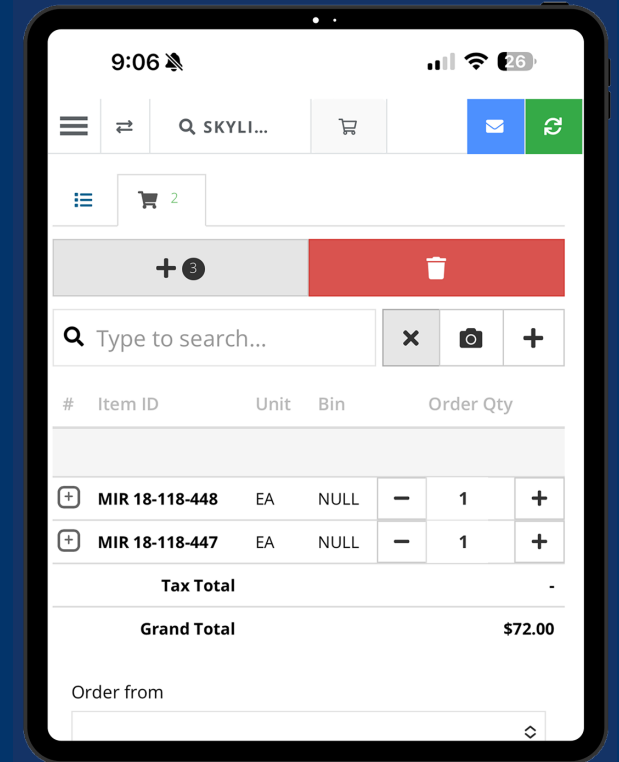

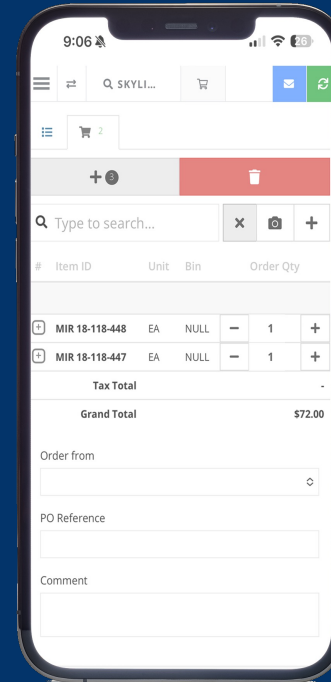

1) Skyline Tools strives to have a simple, updated, and easy-to-use web-based program that every shop and distributor can utilize daily to help many aspects of their business.

2) We created login security and multiple access levels for the Shop and Suppliers to secure the data; Skyline Tools does not share pricing, purchasing, or any private information to any manufacturer or distributor.

3) Skyline Tools has no contracts, no minimum purchases by a specific manufacturer, no limits to items in inventory, and no penalties for using multiple manufacturers.

Web Ordering

Send web-based orders to purchase all of the shop's liquids, dry goods, detail supplies, and equipment needed to complete every repair job in the shop.

1) Phone

2) Tablet

3) Computer

3rd Party Invoices

- 1) Non-Included items are checked out or assigned to Repair Orders (Estimator or Body Tech)
- 2) Recovery Kits can be created for frequently used repair procedures
- 3) Miscellaneous Items can be added for recovery
- 4) All Items added have a proof of purchase, No Insurance Fraud!

Skyline Tools Scoreboard

Utilize the Skyline Tools Scoreboard to follow purchase and usage information in one place:

- Material Purchases
- Material Usage by Tech
- Materials Sold / Recovered

Material Gross Profit

Maintain gross profit \$ by ordering, assigning, and tracking all the materials in the shop

Use Skyline Tools to help each shop grow their profit margins.

Organized and Labeled

Organization is important, every item the shops uses should have a dedicated spot in the material inventory area.

Each item should be barcoded and clearly labeled with a description with the minimum Quantity to keep on the shelf.

Skyline Tools can support any organization method that the shop is currently using. Cabinets, Shelves, Bins, Bakers Racks, or a combination of these.

Skyline Tools also has an extensive install check off list in our Knowledge Base, and we can help shops make purchasing decisions for what is needed.

Recommended Setup for Skyline Tools Stocking Locations:

1. Windows All-in-One PC
2. Wireless Barcode Scanner
3. Dymo 550 LabelWriter Printer
4. Dymo Genuine Labels
5. Power Strip / Surge Protector

PLEASE NOTE: TIM requires Internet and Power to run

- If a reliable Wi-Fi connection is not available at the Stock PC location, you may need a bridge/switch for a LAN drop and CAT 5 cable, Seek the assistance of onsite IT support.
- The DYMO Label Writer Series 550 (Recommended) or 450 (if available) is the only label printer brand and models that are supported by TIM, and both models require Genuine Dymo Labels.
